SKILLS

Front-End Technologies:

- HTML5
- CSS3
- JavaScript (ES6+)

Frameworks/Libraries

- jQuery
- Redux
- React.js

Tools & Build Systems:

- Git
- GitHub
- Vite
- Vercel

SOFT SKILLS

- Teamwork
- Self-Motivation
- Problem Solving
- Adaptability

SUMMARY

Hi, I'm Suraj Yadav a Front-End Developer who enjoys turning ideas into clean, responsive, and interactive web experiences. I specialize in HTML, CSS, JavaScript, and React, and I'm focused on building smooth, user-friendly interfaces that work well across devices. I care about performance, clean code, and intuitive design. While I'm currently focused on front-end development, I'm also eager to keep learning and growing in the field. I enjoy working with teams and turning designs into real, usable products.

PROJECTS

Project-1 Employee Management System

Developed a responsive Employee Management System using React.js that allows users to add, edit, delete, and view student records. The application maintains state using React hooks and persists data in Local Storage, ensuring data retention without a backend. It features a clean UI and intuitive form validation for an improved user experience.

Project-2 Comment Review System

Created a simple web app that lets users write, edit, and delete comments on a pull request similar to how developers review code on platforms like GitHub. The app is built with React and stores data in the browser using Local Storage, so comments stay even after refreshing. It's fully responsive and works well on both desktop and mobile devices.
